Attempt : 1

Total Mark : 10

Marks Obtained : 10

Section 1 : Coding

1. Problem Statement

Monica is interested in finding a treasure but the key to opening is to get the sum of the main diagonal elements and secondary diagonal elements.

Write a program to help Monica find the diagonal sum of a square 2D array.

Note: The main diagonal of the array consists of the elements traversing from the top-left corner to the bottom-right corner. The secondary diagonal includes elements from the top-right corner to the bottom-left corner.

Input Format

The first line of input consists of an integer N, representing the number of rows and columns.

The following N lines consist of N space-separated integers, representing the 2D array elements.

Output Format

The first line of output prints "Sum of the main diagonal: " followed by an integer, representing the sum of the main diagonal.

The second line prints "Sum of the secondary diagonal: " followed by an integer, representing the sum of the secondary diagonal.

Refer to the sample output for formatting specifications.

Sample Test Case

Input: 3
1 2 3
4 5 6
7 8 9

Output: Sum of the main diagonal: 15
Sum of the secondary diagonal: 15

Answer

```
import java.util.*;  
class main{  
    public static void main(String[] args){  
        int sm=0,ss=0;  
        Scanner sc=new Scanner(System.in);  
        int n=sc.nextInt();  
        int[][] num=new int[n][n];  
        for (int i=0;i<n;i++){  
            for(int j=0;j<n;j++){  
                num[i][j]=sc.nextInt();  
                if(i==j){  
                    sm+=num[i][j];  
                }  
            }  
        }  
        for (int i=n-1;i>=0;i--){  
            for(int j=0;j<n;j++){  
                if(i+j==n-1){  
                    ss+=num[i][j];  
                }  
            }  
        }  
        System.out.println("Sum of the main diagonal: "+sm);  
        System.out.println("Sum of the secondary diagonal: "+ss);  
    }  
}
```

```
        ss+=num[i][j];  
    } } }  
    System.out.println("Sum of the main diagonal: "+sm);  
    System.out.print("Sum of the secondary diagonal: "+ss);  
}  
}
```

Status : Correct

Marks : 10/10
